Friday: Product Presentation Workshop

**Link
(https://docs.google.com/document/d/1mQJY80Td6lVzBUklAw1D2WpinUxHi20pHOq3lKuoR6Y/edit#heading
=h.3gat4g7ygd3g)** We've reached the last day of the first sprint. How much progress have you made on
your sprint deliverables?

Today, we will be presenting on our progress so far at the end of the day.

Deliverables

- Uninterrupted hacking
- Project presentation workshop (see content below)
- Presentations (see content below)

Presentations

During the last two hours of the day, we will be giving presentations on our project progress so far.
Please see the material in the **Outcomes Curriculum
(https://docs.google.com/document/d/1mQJY80Td6lVzBUklAw1D2WpinUxHi20pHOq3lKuoR6Y/edit#heading
=h.3gat4g7ygd3g)** for the workshop.

Each group will have five minutes to present the status of their project. Be sure to include the following:

1. Project idea
2. Wireframes, prototypes
3. MVP
4. User research findings
5. Where are you going next?

Each time we have presentations in class, you can think of the time as practice for career day, when you
will be presenting to potential employers. These presentations are an opportunity to practice presenting
your ideas and workflow in a cohesive way. Even better, this is your chance to practice responding to
unexpected questions and difficult feedback. If you feel that you could use more experience talking in
front of a group of people, there's no better time to do it!

Be sure to give constructive feedback and ask tough questions to your peers as well. Giving constructive
feedback is a necessary skill in a professional environment. Please read **The Art of Giving Feedback
(https://medium.com/google-design/the-art-of-giving-feedback-80a6a4e2e843)** by Kai-Ting Huang for some
useful approaches.

Be sure to provide feedback on any component of the project - the technology, the design, aspects of the
market the team may not have considered. Understanding the bigger-picture implications of a project and
seeing improvements is a mindset that will open opportunities to move from junior-level to mid-level
positions, so use this chance to practice this way of thinking.
